

Need to develop help files for your software?

We provide a solid introduction to RoboHelp® and continue with a detailed instruction on using RoboHelp for your help file projects.

Introduction to Adobe® RoboHelp

In this class, you will learn how to:

- Create a help file tailored to your software
- Identify the different components of a help file
- Preview and generate a project
- Format topics
- Import existing files into your help file
- Insert hyperlinks, bookmarks, and pop-ups
- Create an index and glossary

This class is intended for those who are experienced with word processing and technical communications but are new to RoboHelp and help files.

Intermediate Adobe RoboHelp

In this class, you will learn how to:

- Work with graphics and multimedia
- Build conditional tags, variables, and snippets
- Create multiple table of contents
- Insert and format tables
- Use Dynamic HTML (DHTML)
- Set up an index for a book
- Generate printed documentation and generate PDFs
- Work with forms and frames
- Apply skins and templates

This class is intended for those who already have a basic understanding of RoboHelp and are familiar with help file development.
